Score	Beef /20	Breeding Bulls
Thin		
Mod		
Fat		
N/A		

Caesareans and assisted calvings	
No. of caesarean births in the previous 12 months	
No. of assisted calvings in the previous 12 months	
No. of cows calved in the previous 12 months	

If unable to assess individual measures provide reason	
General Comments	

Records		
Record the 'Tally' figure over the last 12 months for the following groups: (detailed in RT Health and Performance Review Sheet if available)		
Mortality	Tally	Comment
Stillborn - 24 hours		Reasons:
24 hours - 10 days		Reasons:
10 days - weaning		Reasons:
Weaning - First calving / point of sale		Reasons:
Less than 30 months		Reasons:
30 months +		Reasons:
Total		

No. of animals on farm over last 12 months (may need to be an average if animals bought and sold during that time):	cows (including heifers put to the bull)	
	unweaned animals	
	weaned animals	
	breeding bulls	

Average weaning age	
---------------------	--

Disbudding, dehorning and castration			
Are cattle polled, horned or mixed?	POLLED / HORNED / MIXED		
Proportion of non-polled animals DEHORNED		Age at dehorning?	
Anaesthesia / Analgesia used when dehorning?	None	anaesthesia	analgesia
Proportion of non-polled animals DISBUDED		Age at disbudding?	
Anaesthesia / Analgesia used when disbudding?	None	anaesthesia	analgesia
Proportion of male animals CASTRATED		Age of castration?	
Anaesthesia / Analgesia used when castrating?	None	anaesthesia	analgesia
